Construction Project Management

Guiding construction projects to successfully meet quality, time and budget objectives

BUSINESS CHALLENGE

Modern construction is a complex minefield of schedules, peripheral conditions, legal obligations, and cost and resources issues. Without expert advice and guidance the project risks failure, and the client faces financial losses and possible liability. Project management helps the investor, project developer or building owner to establish objectives and adapt to this constantly changing environment to ensure the success of their construction project.

SOLUTION

What is Project Management?

Project Management is a service of accompaniment designed to ensure that a construction project is completed on-time, within budget and according to specifications. It involves close collaboration between the client and the appointed Bureau Veritas project manager.

The project manager provides professional advice and technical expertise throughout each phase of the operation. Bureau Veritas delivers a dynamic program of cost and control management, which fixes realistic budgets from the earliest stages and monitors all cost information provided by relevant stakeholders.

What are the key benefits?

- Benefit from early warning of any potential problems or delays;
- Take appropriate action to avoid problems;
- Respect time and budget constraints;
- Meet required specifications;
- Avoid loss and liability.
